

TRAXO

IS AN AUTOMATED
"ROBOTIC" PULLING
TOWER.

THE MULTI-DIRECTIONAL
ROBOTIC TOWER
PERMITS MULTI-
DIRECTIONAL PULLING IN
ONE SMOOTH ACTION,
EASY TO OPERATE VIA
THE CONTROL PANEL,
TRAXO ELIMINATES THE
USE OF TRADITIONAL
CLAMPS AND
CHAINS.

TRAXO

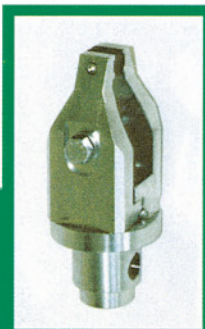

TRAXO

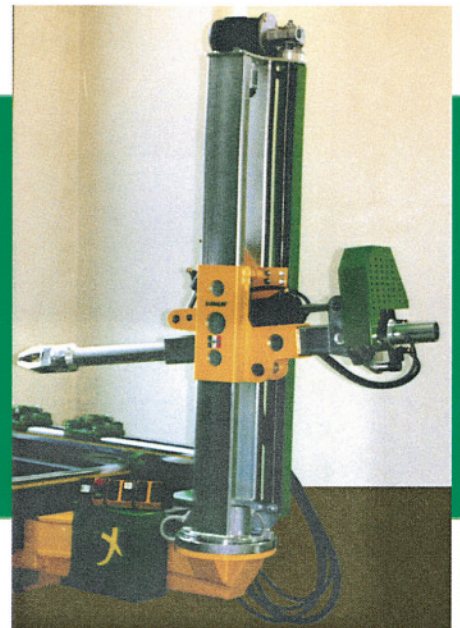

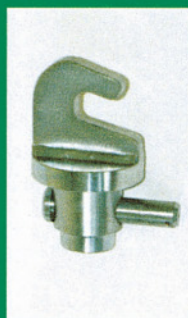

TRAXO IS MORE PRECISE, AND FASTER THAN ANY OTHER TRADITIONAL PULLER, AND IS ABLE TO PUSH AND PULL IN ALL DIRECTIONS UTILIZING IT'S 10 TON CAPACITY.

PUSH-BUTTON COMMANDS ALLOW MULTI-DIRECTIONAL MOVEMENT FROM THE HAND HELD CONTROL PANEL. THE OPERATOR IS FREE TO MOVE WHILE CONTROLLING THE ELECTRO HYDRAULIC PULLING TOWER AND OBSERVING THE REPAIR PROCESS.

TRAXO COMES EQUIPPED WITH A SERIES OF ACCESSORIES THAT ENABLES MULTI-FUNCTIONAL USE, YET STILL MAINTAINS A HIGHER DEGREE OF SAFETY.

TRAXO REPLACES THE VERTICAL PULLING TOWER, BY UTILISING THE HORIZONTAL BASE OF THE TRADITIONAL ROTAX PULLER.
